

STUDENT ASSISTANT (MS THESIS) POSITION FOR POWER TAC

The **Department for Information Systems for Sustainable Society (IS3)** is inviting applications for student assistant role(s) (8 or 16h/week) starting this summer.

We are looking for advanced **early-stage Master's students** with information systems and computer science backgrounds who are interested in joining our team in the following **roles**:

Development Student Assistant

- You will work hands-on with large-scale research simulation platforms [Power TAC](#).
- As a development student assistant, you will support our researchers in Power TAC regarding data acquisition, machine learning, and analytics tasks.
- You should have a solid technical background (esp. Java & Python), analytical skills, and readiness to acquire new technical skills.

The candidate has the opportunity to write the MS thesis within exciting projects on this platform.

Please send any inquiries and your applications (CV summarized in one .pdf file + overview of grades) with the subject: [Power TAC] – student assistant to is3-teaching@wiso.uni-koeln.de
