

2nd Felix Höffler Memorial Lecture

26 October 2021, 5:00- 7:00 p.m.
online

On 4 February 2019, EWI Director Prof. Dr. Felix Höffler passed away after a serious illness. We lost an excellent economist, a splendid colleague and mentor as well as a unique man.

To honour his memory, EWI initiated the Felix Höffler Memorial Lecture. Once a year, an internationally recognized economist will be invited to get into an academic exchange with our PhD students as well as give a lecture about a topic in the field of energy economics. The second Felix Höffler Memorial Lecture will take place on 26 October 2021 via Zoom.

Lecture and discussion

"Paying for electricity generation capacity - and for what it does"
Prof. Richard Green, Professor of Sustainable Energy Business
Imperial College Business School, Imperial College London

Prof. Green is one of the most recognized economists in the field of energy economics, especially regulation and market power in wholesale electricity markets and transmission pricing. He has been awarded a Philip Leverhulme Prize for his work on market power and a Campbell Watkins Prize for his work on electricity decarbonisation.

It would be our pleasure to see you at the second Felix Höffler Memorial Lecture.
Prof. Dr. Marc Oliver Bettzüge and Prof. Dr. Wolfgang Ketter
EWI Directors

Your participation is free. We request you to register: <https://www.ewi.uni-koeln.de/en/events/fhml-2021/>
